PROFESSIONAL SUMMARY

Software engineer with **2+ years** of experience in the analysis, design, programming, testing and debugging of end user applications using **TypeScript, JavaScript, Java, Node.js and React**. Lead the backend of a **7-service platform** built to scale to **100,000+ users**, and gather requirements with product, mobile and frontend teams to deliver features from design to production. Experienced in writing technical documentation, maintaining deployments with Docker and CI/CD, and using Generative AI tools to support everyday development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs, gRPC, WebSockets (Socket.IO), BullMQ, JWT, OAuth 2.0

Frontend: React, Redux Toolkit, responsive web design

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma; schema design, indexing, query optimization

Cloud and DevOps: AWS (EC2, S3, ECR, CloudWatch), Docker, GitHub Actions CI/CD, Grafana, Git

Testing and Documentation: Debugging, API testing with Postman, Swagger/OpenAPI, technical documentation

Practices and Tools: Agile/Scrum, Microservices, SOLID, Data Structures and Algorithms, Generative AI tools (ChatGPT, GitHub Copilot)

PROFESSIONAL EXPERIENCE

Software Engineer and Backend Lead

Altrodav Technologies Pvt Ltd, Bangalore, India | March 2025 - Present

PlaceMux (technical hiring platform)

- Led the analysis and design of the backend for a **7-service microservices platform** (Node.js, NestJS, TypeScript, PostgreSQL, Redis), built to scale to **100,000+ users**.
- Programmed REST APIs and integrated them with **React** components to deliver end user features from requirements to production in Agile sprints.
- Integrated **4 AI/ML models** into the product, including an AI proctoring system that reached **80 to 90% detection accuracy** in production.
- Reduced internal response latency by **about 25%** by moving service-to-service communication from REST to **gRPC**.
- Built a **GitHub Actions CI/CD** pipeline with Docker that rebuilds only changed services, cutting build and deploy time by **40 to 60%**.
- Wrote and maintained **technical documentation** for all service APIs using Swagger/OpenAPI and Postman, and monitored production health with AWS CloudWatch and Grafana.

MeetMux (mobile application for iOS and Android)

- Owned **6+ backend modules** end to end, from gathering requirements to production, serving live end users.
- Built a **real-time chat system** from scratch with Socket.IO and Redis, designed for **10,000 concurrent connections**.
- Debugged and fixed instability under load by resolving **database connection pool issues** and optimizing slow PostgreSQL queries with targeted indexes.
- Collaborated with cross-functional iOS and Android teams to define API contracts and backend-driven configuration.

PROJECTS

Coding Community Platform (NestJS, PostgreSQL, Socket.IO, Redis, Yjs, Next.js): Built real-time chat and live collaborative code rooms; load-tested to **1,000 concurrent users**, **100% message delivery**, **~25 ms** median latency.

VKart, E-Commerce Application (Node.js, Express.js, MongoDB): Built product listing, cart, checkout and order management, with **Razorpay payment gateway** integration and OTP-based authentication.

WE TALKS, Social Platform (React, Node.js, MongoDB, Socket.IO, WebRTC): Built posts, nested comments, real-time chat and multi-user video rooms, deployed on AWS EC2.

EDUCATION

Bachelor of Computer Applications (BCA), Manipal University Jaipur (Online) | March 2026 - Present

Diploma in Computer Science and Engineering, IPT and GPTC Shoranur, Kerala | 2019 - 2022

Certificate in MERN Full Stack Development, Brototype, Kozhikode, Kerala | 2023 - 2024
